

ADMINISTRATIVE - INTERNAL USE ONLY

11 December 1978

MEMORANDUM FOR: Chief, Management & Assessment Staff, DDA

STAT FROM : [REDACTED]
OP ADP Control Officer

SUBJECT : Addendum to New Communications Support
Requirements for FY 1981 Through FY 1985 STAT

REFERENCE : A. OP ADP Control Officer memo dated
6 Dec 78, same subject

B. OC memorandum (OC-M78-770) dated
20 Oct 78, same subject

1. Two (2) additional areas have surfaced for communications support requirements during the period FY 1981 through FY 1985. Please annex the following requirements to our Reference A citings:

(a) A communications line between the VYDEC machines in Correspondence Branch (8th floor Ames) and the Reality minicomputer (5th floor Ames). This would allow correspondence requests to go directly to the word processing machines and verification of correspondence to go from the word processing machines to the minicomputer.

(b) Lines between a bar stripe reader in Ames Building and the Reality minicomputer (5th floor Ames). This would allow file control through the use of bar codes and would eliminate redundant typing of file control numbers.
